

Ambramicina secado®

VETERINARY USE

Intramammary application antimastitic antibiotic based on Cloxacillin to be used for drying.

Formula

Cloxacillin (benzatin) 500 mg
Oil vehicle sufficient quantity for one syringe 10 ml

Indications

Prescribed to control mastitis produced by the following germs:

Gram positive bacteria: *Staphylococcus aureus* (even penicillin-resistant strains), *Streptococcus agalactiae*, *S. uberis*, *S. dysgalactiae*, *Corynebacterium pyogenes*, *Clostridium perfringens*, *C. pseudotuberculosis*, *Bacillus anthracis*.

Gram negative bacteria: *Neisseria spp.*

Target Species

Cattle (milking cows).

Dose, method and way of administration

Cattle: One injector per mammary quarter in a single dose that is 10 ml Ambramicina Secado®, via intramammary administration, equivalent to 500 mg Cloxacillin per quarter. Apply the content of one 10-ml syringe per each quarter through the nipple duct, after thorough milking.

Presentation

Package with 24 and 120 10-ml syringes.
