

Derramin[®] Plus pour-on

VETERINARY USE

External antiparasitic. Treatment and control of the Horn Fly (*Haematobia irritans*) in bovines (cows, heifers, calves, bull calves and young bulls).

Formula

Contents every 100 ml:

| | |
|-------------------------|-----------|
| Cypermethrin..... | 5.00 g |
| Chlorpyrifos..... | 2.50 g |
| Piperonyl Butoxide..... | 1.00 g |
| Excipients, q.s..... | 100.00 ml |

Dose and Method of Use

Administer DERRAMIN PLUS at the applicable dose, directly on the skin, forming a line from the front of the cross to the tail base, using the dosing container or a graded dosing container.

Some components of DERRAMIN PLUS may occasionally cause temporary disturbances.

Dose:

- Animals less than 100 Kg - do not treat.
- Animals 100 to 199 kilograms 5 ml.
- Animals 200 to 399 kilograms 10 ml.
- Animals over 400 kilograms 20 ml.
- Maximum dose 20 ml.

Interval between treatments: Horn Fly: Repeat treatment when fly population is disturbing for the animals or reaches an average of 200 flies per animal.

Presentation

1-liter dosing container and 2.5 liter drum.
