Sodium Selenite (5) Excipients q.s.	1900 mg

Indications:

Dynamide for dogs and cats is especially formulated to improve the general condition of elderly dogs and cats and those with geriatric symptoms. It is a combination of antioxidants, minerals, vitamins, antiarthritis medication and ginseng that stimulate the metabolism of geriatric animals, improving their general condition and vital parameters. With restorative effects, it reduces inflammation and non-specific joint pain. It is a therapeutic aid useful in the recovery from diverse diseases. In cases of prolonged immobility due to surgery recovery or other reasons, it should be administered during and after immobilization until recovery. For animals with joint pain due to exercise or excess weight.

Depending on the condition of the animal at the beginning of treatment, Dynamide improves alert status, the animals' interest in its surroundings, its appetite, mobility and general activity.

Dosage and administration:

Canines and Felines.

Body weight (kg)	Dosage(in tablets)	Frequency (hours)
3 to 5	1/4	Every 24 hs
6 to 10	1/4	Every 12 hs
11 to 20	1/2	Every 12 hs
>20	1	Every 12 hs

Results are achieved gradually and reach expected levels at 2 to 3 weeks. A minimum treatment period of six (6) weeks is advisable. In general, an increase in dosage does not bring about earlier or better results.

Presentation:

Box with 30 palatable tablets.
