

Enroxina[®] 150

Broad spectrum chemotherapeutic agent against Gram positive and Gram negative microorganisms for dogs and cats.

Formula

Each multi-dose tablet contains:

Enrofloxacin150.0 mg
Excipients q.s.400.0 mg

Indications

It is indicated for the treatment of respiratory, digestive, reproductive and urinary tracts and skin infections. Enrofloxacin is active against *E. coli* - *Salmonellas* - *Proteus* - *Klebsiellas* - *Pasteurellas* - *Bordetellas* - *Pseudomonas* - *Brucella canis* - *Estafilococos* - *Corynebacterium* - *Estreptococos* and *Mycoplasmas*.

Dosage and Administration

Both in dogs and cats, administer a daily dose of 5 mg/kg (corresponding to 1 tablet every 30 kg of bodyweight). This dose should be repeated every 24 hours.

The multi-dose tablet allows for an easy administration even in animals of low weight. The treatment can be administered every 12 hours according to the pathology or as determined by the acting veterinarian.

The treatment should last from 5 to 10 days depending on the affected organ, the severity of the case and the opinion of the acting veterinarian. In dermatological diseases, a long-term treatment may be required for over 20 days.

Package

Box containing 10 multi-dose tablets.
