

Enroxina[®] 50

Broad spectrum chemotherapeutic agent against Gram positive and Gram negative microorganisms for dogs and cats.

Formula

Each multi-dose tablet contains:

Enrofloxacin 50.0 mg
Excipients q.s. 300.0 mg

Indications

It is indicated for the treatment of respiratory, digestive, reproductive and urinary tracts and skin infections. Enrofloxacin is active against *E. coli* - *Salmonellas* - *Proteus* - *Klebsiellas* - *Pasteurellas* - *Bordetellas* - *Pseudomonas* - *Brucella canis* - *Estafilococos* - *Corynebacterium* - *Estreptococos* and *Mycoplasmas*.

Dosage and Administration

Administer a daily dose of 5 mg/kg (corresponding to 1 tablet every 10 kg of bodyweight) in dogs and cats. This dose should be repeated every 24 hours.

The multi-dose tablet allows for an easy administration even in animals of low weight.

The treatment should last from 5 to 10 days depending on the affected organ, the severity of the case and the opinion of the acting veterinarian.

In dermatological diseases, a long-term treatment may be required for over 20 days.

Package

Box containing 10 multi-dose tablets.
