

# Laxavet®

Laxative palatable paste for dogs and cats.

## Formula

Malt extract .....	47.0 g
High density mineral oil .....	44.0 g
Excipients q.s. ....	100.0 g

## Indications

Laxative and gastrointestinal emollient product:

To prevent and treat gastrointestinal obstructions caused by hair boluses in cats.

As an aid in the mobilization of gastrointestinal foreign bodies both in dogs and cats.

To treat constipation in dogs and cats.

## Dosage and Administration

For dogs and cats, administer an oral dose of 1 lineal centimeter from the tip of the tube per kilo of bodyweight (approximately ¼ to ½ teaspoonful).

To prevent the formation accumulation of hair boluses in cats, administer once to twice a week. To remove hair boluses in cats and to expel gastrointestinal foreign bodies both in cats and dogs: administer twice a day until they are expelled.

For the treatment of chronic constipation in cats and dogs, administer 3 times a week. Laxavet can be administered directly through the animal's mouth or mixed with food.

For easy ingestion in cats, Laxavet may be applied in the carpal region to allow for licking.

## Package

Tube containing 40 g.
