

# Meltra<sup>®</sup> ABZ 10

VETERINARY USE

Internal broad spectrum antiparasite drug for cattle. Aqueous suspension ready for use.

## Formula

Albendazole ..... 10 g  
Excipients q.s. .... 100 mL

## Indications

Antiparasitic treatment of verminous gastroenteritis in cattle and other parasites. Its spectrum of action includes:

Gastrointestinal nematodes

Mature and immature forms of *Haemonchus spp.*, *Ostertagia spp.*, *Trichostrongylus spp.*, *Cooperia spp.*, *Nematodirus spp.*, *Strongyloides spp.*, *Bunostomum spp.*. It is active against hypobiotic forms of *Ostertagia ostertagii*. It acts on adult *Oesophagostomum spp.*

Lung nematodes

*Dictyocaulus viviparus*

Cestodes

*Moniezia spp.*

Trematodes

*Fasciola hepatica*: adults.

## Dosage and Administration

Administer orally only in the following doses:

Gastrointestinal and lung nematodes:

Cestodes: 1 mL every 20 kg of liveweight

Hypobiotic larvae of *O. Ostertagii*: 1.5 mL every 20 kg of liveweight.

Adult *Fasciola hepatica*: 2 mL every 20 kg of liveweight

Treatment is a single dose. The opportunity to worm a herd should be defined by the acting veterinarian based on the health problems detected.

## Package

Drum containing 5 liters.
