

Meltra[®] Plus Palatable

Internal antiparasitic for the control of intestinal nematodes and tapeworms infections in dogs.
Palatable tablets.

Formula

Each palatable tablet contains:

Albendazole	900.0 mg
Praziquantel	50.0 mg
Excipients q.s.	2000.0 mg

Indications

For the control of the following dog parasites:

Nematodes: *Toxocara canis*, *Toxascaris leonina*, *Ancylostoma caninum*, *Uncinaria stenocephala* and *Trichuris vulpis*.

Tapeworms: *Echinococcus granulosus*, *Dipylidium caninum*, *Taenia hydatigena*, *Multiceps multiceps*, *Taenia serialis*, *Taenia pisciformis* and *Mesocestoides corti*

Dosage and Administration

1 tablet every 10 kg of bodyweight, in a single dose.

Tablets can be administered to the animal either directly through its mouth or mixed with the food.

For parasites caused by nematodes, repeat the treatment after twenty (20) days.

In the case of tapeworms reinfestations, repeat the treatment every forty-five (45) days or as determined by the acting veterinarian.

Use in animals of forty-five days of age or older and weighting over 2.5 kg. No fasting is required.

In animals over 25 kg of bodyweight, divide the dose in two intakes with an interval of 12 hours.

Package

Boxes containing 2, 4 and 6 grooved palatable tablets.
