

Meltra® 4% Premix

VETERINARY USE

Internal antiparasitic for pigs, effective against adults, larvae and eggs of nematodes. To administer in food.

Formula

Febendazole 4.00 g
Excipients q.s. 100,00 g

Indications

Prescribed for prevention and treatment of infestation caused by the following parasites:

Gastrointestinal

Hyostrogylus rubidus (stomach), *Ascaris suum*, *Strongyloides ransomi* (small intestine), *Oesophagostomum spp*, *Trichuris suis* (large intestine).

Lungs

Metastrongylus spp.

Kidneys:

Stephanurus dentatus.

Dose and Method of Administration:

In fattening pigs: Administer 3 g Meltra 4% Premix per 25 kg of live weight, equivalent to 5 mg of fenbendazole per kg of weight. Based on a daily consumption of 10 kg food per 200 kg. of live weight per animal, add:

Duration of treatment	Dosis Meltra 4% Premix / Tn de alimento terminado	Equivalence in fenbendazole
1 day	2.5 kg	100 ppm
5 days	500 g	20 ppm
10 days	250 g	10 ppm
Ongoing	150 g (from weaning and during fattening)	6 ppm

Important: In infestations by *Stephanurus dentatus* double the dose (10 mg/kg live weight for one day). For treatment of *Cysticercus cellulosae*, treat with 5 mg/kg live weight for 7 days. Warning: Ensure proper mixture when adding the product to the food. Consume medicated food within 15 days of preparation.

In sow : Based on a daily consumption of 5.51 lb food per 200 kg. of live weight per animal, add:

Duration of treatment	Dosis Meltra 4% Premix / Tn de alimento terminado	Equivalence in fenbendazole
1 día	10 kg	400 ppm
5 días	1 kg	80 ppm
15 días	670 g	27 ppm

Presentation

Plastic container for 1 kg.

Three-foil bag for 5 kg.
