

Power[®] Plus spray

Power Plus Spray is an insecticide against fleas and ticks and tick repellent for dogs.
Effective repellent against domestic flies, ear-tip flies (*Stomoxys calcitrans*) and mosquitoes.

Formula

Imidacloprid	0.5 g
Permethrin	2.0 g
Excipients q.s.	100.0 mL

Indications

Power Plus Spray is indicated for the prevention and treatment of flea infestation (*Ctenocephalides felis*, *Ctenocephalides canis*) and ticks (*Rhipicephalus sanguineus*) on dogs. It prevents reinfestations for a period of up to 4 weeks (28 days). Use only on dogs over 2 months of age. Effective repellent against domestic flies, ear-tip flies (*Stomoxys calcitrans*) and mosquitoes.

Dosage and Administration

This product is for external use. It should be sprayed over the animal's body, from the bottom up and from the back to the front (against the nap). It is advisable to wear gloves to rub the animal's skin and coat to allow for a thorough distribution of the product. If the animal is bathed or wet due to rain, the skin and hair must be completely dry prior to the treatment. Avoid contact with the animal's eyes and snout. To treat the head, spray the product on the gloves and distribute it on the area to be treated. Treatment should be maintained for as long as necessary, while fleas and ticks infestation is present, or as determined by the acting veterinarian.

Apply 3 sprays (2 mL) every kg of bodyweight.

Package

Sprayer with dispensing pump containing 100 mL.
