

PIPETTE Power[®] spot on

Insecticide pipette for cats that acts on fleas.

Formula

Imidacloprid 8.0 g
Excipients q.s. 100.0 mL

Indications

Power Cats is indicated for the prevention and treatment of flea infestation on cats (*Ctenocephalides felis*, *Ctenocephalides canis*) over 2 ½ months of age.

Dosage and Administration

This product is for external use. Apply the product directly on the animal's skin, separating the hair in the area to be treated so that the product is in direct contact with the skin. The cat should be standing for easy application of the product. The animal's coat should be dry. Avoid contact with the animal's eyes and snout.

Weight

Cats up to 4 kg
Cats from 4 to 8 kg

Dosage

1 pipette with 0.5 mL.
1 pipette with 1 mL.

A single application of this product kills adult fleas and larvae and prevents flea infestation for a period of up to 4 weeks (28 days).

Package

Box with a tamper-proof plastic pipette for different weights:

Cats up to 4 kg of bodyweight: pipette with 0.5 mL
Cats from 4 to 8 kg of bodyweight: pipette with 1.0 mL
