

Total Calcifier PG Powder

Powder vitamin-mineral supplement for dogs and cats.

Formula

A) Minerals: Calcium carbonate 97.713 g; Calcium iodate 0.011 g; Magnesium sulphate 2.200 g; Copper oxide 0.041 g; Manganese oxide 0.035 g

B) Vitamins: Vitamin A (Palmitate) 1.000.000 I.U.; Vitamin D3 (Cholecalciferol) 100.000 I.U.; Vitamin E 5 mg; proper vehicle q.s. 100.0 mL

Indications

It corrects calcium balance: phosphorous intake, when food is based on meat, grain and vegetables in growing animals, pregnant and lactating females and adult and senile dogs and cats.

It corrects calcium deficiencies by removing and the clinical signs and preventing the appearance of fibrous osteodystrophia, osteoporosis and puerperal tetany.

Dosage and Administration

The amount of powder vitamins (A formula) to be given depends upon to the amount and type of food administered to the animal.

For every 100 g of meat or 250 g of dry grain ingested by the animal, you must give the animal 500 mg (1/2 measuring spoon) of the formula.

In both cases, the powder should be mixed with the food.

The amount of vitamins in drops (B formula) is related to the bodyweight of the animal.

For adult dogs, the dose is 1 drop every 5 kg of bodyweight daily.

For puppies, the dose is 2 drops every 5 kg of bodyweight daily.

For cats up to 1 kg of bodyweight, administer 1 drop daily. For cats over 2 kg of bodyweight, 2 drops daily.

Package

Container with 150 g plus dropper containing 20 mL.
