

Meltra[®] spot on

Internal antiparasitic with spot on application for nematode and taenia control in felines.

Fórmula:

Cada 100 ml contiene:

Praziquantel	9,6 g
Ivermectin	0,8 g
Excipients q.s	100,0 mg

Indications:

Meltra Felines is a specially formulated internal antiparasitic easy to apply for felines with weight over 1.5 kg.

Indicated for treatment and control of the following parasites:

- Nematodes: *Toxascaris leonina*; *Toxocara cati*; *Ancylostoma spp*; *Trichuris spp*.
- Taenias: *Echinococcus granulosus*; *Dipylidium caninum*; *Taenia hydatígena*; *Multiceps multiceps*; *Taenia serialis*; *Taenia ovis*; *Taenia taeniformis*; *Taenia pisciformis*, *Mesocestodes corti*.

Dosage and Administration:

A - The product is for spot-on external use. It is to be applied topically on the animal skin. Apply the whole content along the neck between the nape and the beginning of the spine, separating hair and placing the pipette on the skin.

B - In 1.5 to 4 kg felines, one 0.5 ml pipette will be applied.

C - In 4 to 8 kg felines a 1.0 ml pipette will be applied.

The product should be applied with the animal standing up. Fur should be dry.

Avoid contact with the animal's eyes and mouth.

Package:

1.5 to 4 kilograms: Pipette with 0.5 ml product.

4 to 8 kilograms: Pipette with 1 ml product.
